

snackpals®

Bird Feeder

Required Materials:

- (1) Clean Snack Pals container (any shape or size will work!)
- Soil
- Seeds - any kind
- Decorations

Step 1: Ask an adult for help creating holes in each corner of the top of the container.

Step 2: Decorate the container in a way that makes you happy and then put the container down top-up on a flat surface

Step 3: Cut 2 lengths of string (we recommend around 32 inches each), and thread one down through one hole, then up through the next hole to the left. Do the same with the other string on the other side of the container.

Step 4: Tie all four ends of the strings together. Flip container over.

Step 5: Fill your container with 1/2 inch - 1 inch of bird seed and hang it on a branch near a window you can see it from easily. It might take some time for birds to find your offering – even up to a couple of weeks!

Don't forget to submit a photo of your masterpiece to the art gallery at hannafordsnackpals.com!
